PROFESSIONAL SUMMARY

Senior Android Developer and Team Leader with 12 years of experience across ride-hailing, fintech, healthcare, and e-commerce. Sole Android engineer at Drovax (Saudi ride-hailing), owning architecture and release for the Captain and Passenger apps with Kotlin, MVVM, MVI, and Clean Architecture; independently ships Kotlin Multiplatform (KMP) and Jetpack Compose apps to Google Play and the App Store. Cut native memory by 92% (1.4 GB to 106 MB), led Android teams of 16+ developers, and shipped 23+ production apps to Google Play.

WORK EXPERIENCE

Senior Android Developer at Drovax, Riyadh

Sep 2024 - Present | Full-time | On-site

- Sole Android engineer for the Drovax ride-hailing platform - responsible for architecture, development, and release for both Captain & Passenger apps, serving 10,000+ riders and 5,000+ drivers across Saudi Arabia.
- Cut native memory by 92% (1.4 GB to 106 MB) by architecting and debugging a high-performance mapping system (Google Maps SDK + Mapbox), eliminating OOM crashes in production.
- Reduced Maps API costs by cutting requests-per-trip from 7.7 to 5 through Google Places and Mapbox billing optimization.
- Built an automated OCR pipeline using ML Kit and Google Vision to extract driver and vehicle registration data from images, cutting manual document review.
- Built and maintained GitHub Actions CI/CD pipelines with Maestro E2E testing, automating release QA.
- Stack: Kotlin, MVVM, MVI, Clean Architecture, AWS, Firebase, Google Maps SDK, Mapbox.
- Live on Google Play: [Drovax Passenger](#) | [Drovax Captain](#)

Android Team Lead at Leo Tech, Jeddah

Dec 2023 - Sep 2024 | Part-time, concurrent (Dec 2023 - Mar 2024), then Full-time Remote (Mar 2024 - Sep 2024)

- Led a 3-person team building a ride-hailing platform (**Go Now & Go Now Captain**), owning Android development hands-on.
- Delivered production apps with real-time tracking, driver-matching features and real-time trip management and navigation.

Android Team Lead at AAIT, Mansoura

Nov 2020 - Mar 2024 | Full-time | On-site

- Led a team of 16+ Android developers delivering 23+ production apps across ride-hailing, delivery, e-commerce, healthcare, and services on the AAIT Google Play account. Managed Agile/Scrum sprints and led code reviews across the team.
- Notable: SAR Lost & Found (Saudi Railway), King Salman Social Center, Morsaal delivery, Taqyeed fuel management, and 20+ Ride-Hailing & Service Apps.
- Introduced Clean Architecture, MVVM, and Kotlin Coroutines as team standards.
- Managed Google Maps SDK, Firebase, REST APIs, and real-time Socket.io integrations.
- Live on Google Play: [King Salman Social Center](#) | [Morsaal Awamer](#) | [Lyakon \(Lyakon User | Lyakon Doctor\)](#) | [Enjoy Driving \(Enjoy Driving User | Enjoy Driving Delegate\)](#) | [Suq Alhawti](#) | [Last One Hour](#)

Android Team Lead at IPDA3 Tech, Mansoura

Nov 2018 - Nov 2020 | Full-time | On-site

- Delivered multi-app platforms: Sonqr (home delivery - 3 apps), Mo3een (medical - 2 apps), Zonae (nursing - 2 apps).
- Built Sofra v2 (food ordering), Blood Bank v2 (donation platform), One v2 (payment gateway + Bluetooth printers).
- Maintained the Saudi Ministry of Health pregnancy app (Amena) and the Saleh Saudi Cars Trading app.

Senior Android and iOS Developer at Smart Deals, Egypt

Dec 2017 - Nov 2018 | Full-time | On-site

- Developed **Wzzaa**, a social media & marketing ads platform, shipped for both Android and iOS.
- Stack: Java, XML Layouts, MVC, MVP, Dagger 2, Firebase, Material Design.

Android Developer at Windozer, Egypt

Jun 2014 - Dec 2017 | Full-time | On-site

- Developed a comprehensive healthcare application covering patient management, appointments, and medical records.
- Built core features using Java, REST APIs, and Android SDK with a focus on reliability and data accuracy.
- Gained foundational expertise in OOP, clean code practices, and consumer-facing mobile UX.

FREELANCE & PART-TIME EXPERIENCE

Senior Android Developer at Ekhsemli, Riyadh

May 2026 - Present | Part-time (concurrent) | Remote

- Building a discount coupon application operating in Saudi Arabia.
- Stack: Kotlin, MVVM, MVI, Clean Architecture, Firebase.
- The app serves **100,000+ users**.

- Live on Google Play: [Ekhsemli](#).

Senior Android Developer at TAAT Platform, Riyadh

Jan 2023 - Aug 2024 | Freelance (concurrent) | Remote

- Built TAAT ride-hailing & delivery platform (Client & Captain apps)
- Reduced mapping costs by migrating from Google Maps to TomTom - Kotlin, MVVM, Clean Architecture, Firebase.
- Live on Google Play: [TAAT Client](#) | [TAAT Captain](#)

PERSONAL PROJECTS

Dakhly - Personal Finance App (KMP, Android & iOS)

Jun 2026 - Present

- Owner and sole developer of Dakhly, a personal finance Kotlin Multiplatform app targeting Arabic-speaking users.
- Built with Kotlin, Kotlin Multiplatform (KMP), Firebase Auth, Firebase Realtime Database, Koin, and SQLDelight.
- Covers full product lifecycle: auth, home dashboard, wallets/transactions, categories/budgets, AI assistant, and premium gating.
- **Dakhly iOS** - Kotlin Multiplatform (KMP) app - Firebase Auth OTP + Google Sign-In, Arabic RTL (published on the App Store; Android release in progress)

TECHNICAL SKILLS

- **Languages:** Kotlin, Java, SQL
- **Android:** Android SDK, Jetpack, Coroutines, Flow, WorkManager, DataStore, Navigation Component, Paging 3, Accessibility, RTL Support, Localization, Offline-First, ML Kit, Google Vision and CameraX
- **UI:** Jetpack Compose, Compose Multiplatform, XML Layouts, Material Design 3
- **Architecture:** Clean Architecture, MVVM, MVI, MVP, MVC, SOLID, OOP, Design Patterns, Modularization, KMP (Kotlin Multiplatform)
- **Dependency Injection:** Hilt, Dagger 2, Koin
- **Networking:** Retrofit, OkHttp, Ktor, REST APIs, Socket.io, RxJava, GraphQL, AWS AppSync
- **Databases:** Room, SQLDelight, SQLite, Firebase Realtime Database, Firestore
- **Maps & Location:** Google Maps SDK, TomTom Maps SDK, Mapbox, HERE Maps, OSRM
- **Firebase:** Authentication, Cloud Messaging (FCM), Crashlytics, Analytics, Remote Config
- **Security & Release:** SSL Pinning, Biometric Authentication, ProGuard/R8, App Bundle (AAB), Deep Links, Google Play Console, App Store Connect
- **CI/CD & Testing:** GitHub Actions, GitLab CI, Fastlane, Maestro (E2E automation), JUnit, Mockito, Espresso, Unit Testing
- **Performance:** Memory Profiling, LeakCanary, Android Profiler, Native Leak Resolution
- **Cloud & Tools:** AWS, Git, GitHub, GitLab, Bitbucket, Gradle (Kotlin DSL), Android Studio, Xcode, Jira, Confluence
- **AI Integration:** Claude API (Anthropic) - In-App AI Assistant, Prompt Engineering, LLM Integration in KMP

LEADERSHIP & SOFT SKILLS

- Team Leadership: led Android teams of 16+ developers - onboarding, mentoring and technical career development
- Agile Delivery: Scrum sprint planning, estimation, and release planning across parallel app teams
- Cross-functional collaboration across mobile, backend, QA, and product
- Performance optimization and production debugging
- Google Play and App Store publishing, release management, and compliance
- Stakeholder communication and problem solving

EDUCATION & CERTIFICATIONS

Bachelor of Computers & Information - Computer Science - Al-Sharif Academy, Kafr Al-Sheikh

Sep 2012 - May 2016

Android Developer Nanodegree Udacity

2016

Java (J2SE & J2EE) IT Share Center, Kafr Al-Sheikh

Jun 2013
